REST API using MongoDB, Express and NodeJS

Adhyuth Charan K (21011102008)

index.js

```javascript
const express = require("express");
const mongoose = require("mongoose");
const app = express();
mongoose.connect("mongodb://localhost:27017/college", {
  useNewUrlParser: true,
  useUnifiedTopology: true
})
.then(() => {
  console.log("Connection successful");
})
.catch((error) => {
  console.error("Error connecting to MongoDB:", error);
});

const userschema = new mongoose.Schema({
  name: String,
  email: String
});
const usermodel = mongoose.model("students", userschema);
// Insert a new document into the "students" collection
const newStudent = new usermodel({ name: "John Doe",
  email: "john.doe@example.com"
});
newStudent.save()
.then(() => {
  console.log("New student added to the database");
})
.catch((error) => {
  console.error("Error adding new student:", error);
});

app.get("/users", (req, res) => {
  usermodel.find({})
  .then((students) => {
    res.json(students);
  })
  .catch((err) => {
    console.log(err);
    res.status(500).json({ error: "Internal server error" });
  });
});
```
```
app.listen(3000, () => {
  console.log("Server listening on port 3000");
});
```

Outputs:

Before running:

After running:

```
PS C:\Users\Admin\Express\mongoAPI> node index.js
(node:13684) [DEP0040] DeprecationWarning: The `punycode` module is deprecated. Please use a userland alternative instead.
